WILMINGTON, N. C., MONDAY, JULY 6, 1857. To-Morrow, July Fourth, 1857.

We know how much to value friends when called upon to part with them. We know what estimate to place upon blessings, when threatened with their loss. Time which the wayward votary of pleasure makes it his business to kill, becomes more precious than any earthly thing, when the sands in the hour-glass of life can apparently be counted. We cling to old associations and institutions with a more regretful feeling, as dangers threaten their permanence, and our judgments assure us that the time may come, and, if the same tide continues to set, must come, when we will be called upon to resign them, with all their cherished memories. With what a longing, lingering look, the great-hearted, sober-headed men of the revolution, took leave of the old land of their fathers, cast off the political ties and associations of a life-time-the ideas of loyalty, with which nearly all had grown up-the old reminiscences of glory connected with the "meteor flag" of Britain, that had been theirs too, is told in every page of our history prior to the Declaration of Independence. That instrument itself, teems with evidences of the same feeling. When, one year before, the men of Mecklenburg sent on their Declaration to the Continental Congress, it was deemed premature by that grave and thoughtful body. All things had to be tried be fere hope could be abandoned, and the irrevocable step taken. And when the time did come, when that step was taken, who can say that, in the inmost hearts of the noble band of signers, many a pulse did not throb painfully, many a tender cord strain to its almost tension, scarcely less with a sense of deep responsibility for the future, then with sad and pleasing memories of the past.

A few brief years more-a mere point in the life of a great nation, will complete the cycle of a century since the proclamation of independence, from the steps of the old State House in Philadelphia. Even then some few survivors of the early struggle may still linger upon the confines of existence, venerable but feeble relics of a past age and time, talking, as old age will talk, of the deeds of their youth, as things of yesterday, while the great movements of later years will be to them as a distant murmur, wafted onward by the winds and passing away unheeded.

1876 is but nineteen years removed from us. A narrow gap, but one which may be sufficiently deep to swallow up much of what now appears permanent Who, in truth, is bold enough to span that gap with the frail bridge of speculation. The ranting demagogue may pile up tropes and figures, and beguile hi hearers with vague talk of the American Eagle and the Glorious Union. The patriotic orator, full of the inspiration of the day, and warmed by its associations, may hopefully deem that the great work done by the men of the last century-the mighty fabric of constitutional liberty erected by their wisdom and their sacrifices, is beyond the reach of sacrilegious hands; but the thoughtful observer must reluctantly acknowledge to his own heart, that so surely as tomorrow's sun will rise, so surely will the present tendency of things, if persevered in, eventuate in a dissolution of the Union, or a perversion of its powers and capacities from their original and constitutional objects-a perversion to which dissolution is to be preferred ten times over.

Up to the final moment, the men of '76 clung with regretful feelings to the past. They disliked to take the last irrevocable step-to make a breach that no time could close-a gulf into which must be thrown the constitutionality of the Metropolitan Police Bill. all former associations. Yet when the time had The Judges stood four for to two against. Mayor come, they took the step-they made the breachthey opened the gulf, and cast into it all fond memorics of the political past.

Hope alone remains in place of the proud security of former days. Well might all men in all parts of this vast country re-echo the prayer of Governor Wise. "May God revive our Revolutionary feelings!" And especially should this aspiration dwell with the people of the South. The men of the Revolution were patient, long suffering, clinging fondly to the associations of the past, cherishing hope even when hope appeared to have departed; but when the time had finally arrived in dant. which decisive action or ignominious submission were the only alternatives, there was then no faltering in their ranks, no reliance upon empty words-no looking back. They had counted the cost, and they stood Great Britain but on the Continent. the hazard of the die.

But we grow sombre-perhaps we feel so. Let us rejoice that we can still celebrate the "glorious Fourth," and enjoy one day free from the toil and moil, the tear and wear and worriment of life. Let us think only of what is bright; the reverse comes and against our will .- Daily Journal, 3d inst

The Fourth.

The day was ushered in with the usual demonstrations. Cannon were fired, bells rung, and all the accustomed manifestations made. During the greater part of Saturday the town seemed almost deserted. Everybody appeared to have left on the steamboat excursions, or gone off on the railroads or rode down to the sound to witness the boat-races, or taken themselves off to some distant retreat. Upon the whole, the office. the occasion, if passing off quietly was none the less pleasant, and would have been marred by no unpleasant circumstance had it not been for a very painwas engaged in ramming it was so terribly injured by the discharge as to leave no hope of his recovery.

leaves a family. He had been sometime since employed as a watchman at Messrs. Kidder & Marin's Steam Mill, whether he was still so employed we do not know, but rather think he was.

The procession and ceremonies at the Court House came off at a comparatively early hour, earlier than we had anticipated, though in strict conformity with the programme. The court room was crowded by a very brilliant audience-so much crowded indeed that we found it impossible to obtain admittance, and were forced to catch the remarks of the orator as best we could on the outside, where, spite of the inconvenience we maintained our stand, an eager and gratified listener throughout. The National and Mecklenburg declarations were read well and im-Esq. Mr. Waddell's effort was really and truly a against-the exhibitions of patriotism that gave hope cited as grounds and examples for emulation. And then we have lost both our chain and chronometer. while the patriotism that had redeemed much of evil in the Legislative halls and public movements was pointed out, another kind of patriotism was not forgotten-the patriotism of those whose gentle influin hand the performance of a duty too long neglected by her sons, and the Mount Vernon Association marked woman's reverence for the first of Americans

We would take pleasure in giving a more detailed report of Mr. Waddell's address, but situated as we were, we could only catch the drift without being able to follow the details, any attempt to report which, could only result in doing injustice to a composition worthy of better and more permanent record.

During the delivery of the Oration, some four to six figures. representatives of juvenile columbia, vulgarly known as "Young America," kept tumbling up and down get to Weldon by the upper route at 114 a. m. next irritation of all who tried to listen.

We learn that the boat-race at the Sound was quite a pleasant affair. Some eight boats started. The flag was adjudged to that belonging to Paxton Watters, Esq., although we have heard that that belonging to E. D. Hall, Esq., would most probably have been the victor, but for some misunderstanding about the ground to be sailed over. Such is the talk.

The German Volunteers turned out at an early hour, and paraded in honer of the day. Owing to a disputed claim for precedence, they did not join with Leave Wilmington at 4 30 p. m. Arrive in Weldon 1 00 a. m. -8 h the other Companies at the regular time. We trust that this matter may be satisfactorily arranged. It is doing harm to our whole Military organization

The Fourth of July is a day by itself, and it would hardly be expected that it should go off without some the two. Yet this schedule will very well bear a little drinking, but upon the whole, there was less than usual, and no noise nor ill nature. The approach of Sunday may have had its influence. At any rate the town was quiet rather earlier than on the average of nights.

The excursionists to Smithville and elsewhere cujoyed themselves, we believe, and met with no accident. So passed the 4th, and so it will stay past un til another year shall have rolled around.

HOW TO STOP TABLE TURNING .- In the course of its travels, table turning reached Munich, the capital of bavarja. Liebig had recently been established there as a professor of chemistry, the enlightened government of that kingdom having drawn him thither from Glessen. The experiment of table turning succeeded marvellously at first. Good and intell gent people were amazed at the phenomenon, arth-nfairly believed, either that spiritual forces were at work in the mahogany, or that some new physical power was unfolding itself. They naturally went enough for a distant posterity, however rapidly her to the great philospher to obtain his opinion. He population may multiply. A Squeamish Abelitionist. A certain Mr. Higgison, not long since, made a speech at the anniversary of the Anti-Slavery Society in New York. To Garr son he writes as follows:

Dear Sir: I have but just now had an opportunity of reading the report of some remarks of mine in the Liberator of June 12. It is, as usual, admirable, but contains two errors which I must correct. I never called any one a 'hell demon' in my life; if I were in the habit of using that class of epithets, I should certainly apply them to slavery and its abettors; but I am not. I do not remember what I did say in place of the above phrase, but I am sure of what I did not

What delicacy! Higgison thinks we are "hell damons," but is too polite of diction to say so.

COMMANDER DAVIS'S INSTRUCTIONS .- The telegraphers from this city to the distant press are entirely in error in their representations with reference to the instructions from the late Secretary of the Navy to Commodore Mervine, and through him to commander Davis, under which they allege the latter acted in saving Gen. Walker and the few of his followers who got off with him to the tender mercies of the Costa Ricans.

No instructions whatever were given to commodore Mer-vine by Secretary Dobbin that will bear twisting into an intimation that a vessel of the squaron might be employed in interfering in ithe Nicaraguan war, even if an opportunity occurred to save the lives of the fillibusters, by getting them clear of the country. He was simply ordered to send a vessel to San Juan del Sur, and in that order no mention of Walker's name or of his affairs was made. Thus not only the story alluded to above falls to the ground but the story that the President has declared his approval

of the act of Commander D. under his instruction, but not of NORTH EASTERN RAIL ROAD. - This important ave-

A humorous old man fell in with an ignorant and rather impertinent young minister, who proceeded to inform the gentleman, in rather positive terms, that he would never reach heaven unless he was born again, and added, " I have experienced that change, and now feel no anxiety." "And have you been born again ?" said his companion. "Yes, I trust I have." "Well," said the old gentleman, eyeing him very attentively, "I shouldn't think it would hurt you to be born once more."

The Black Kepublican State Convention of Maine, on Tuesday last, recommended " a withdrawal of the liquor question from politics!" This is a sober second thought, very creditable to the Maniaco. We have hopes that the straight-jacket may eventually be entirely removed.

Education is not so flourishing after all in Great Britain. A London journal says :-- " We have many schools and many teachers, and much money for educational purposes, but for all except the rich of the upper, and the well-to-do of the middle classes,

of his people, fell victims to the small pox."
